

# Exercise: JavaScript for Front-End

Problems for exercises and homework for the "[JavaScript Applications](#)" course @ SoftUni

## 1. Job Application

Create the following page using [Bootstrap](#) and the plugins – [Collapse](#), [Social Buttons](#), [SweetAlert](#) and [Dropify](#).

The first screenshot shows the 'JOB APPLICATION' form with the title 'WE ARE LOOKING FOR SOMEONE LIKE YOU'. The first section, 'Enter your data', is active and contains input fields for First Name, Last Name, Email Address, and a Password field with a toggle for 'Show or hide password'. Below these are buttons for 'Cancel' and 'Next Step'. The second section, 'Social Media Profiles', and the third section, 'Upload CV', are collapsed.

The second screenshot shows the 'JOB APPLICATION' form with the 'Social Media Profiles' section expanded. It contains input fields for Twitter profile, Facebook profile, GitHub profile, and LinkedIn profile. The 'Enter your data' and 'Upload CV' sections are collapsed. The 'Cancel' button is at the bottom.

The third screenshot shows the 'JOB APPLICATION' form with the 'Upload CV' section expanded. It features a large dashed box for uploading a file, with a 'Drop and Upload file here or click' instruction and a 'No file chosen' button. The 'Enter your data' and 'Social Media Profiles' sections are collapsed. The 'Cancel' button is at the bottom.

## Your task

You will be given some **resources** (images and screenshots). On that base you must implement the **front-end part** by using **HTML**, **CSS** and **Bootstrap** and the logic to attach events on all the **buttons**.

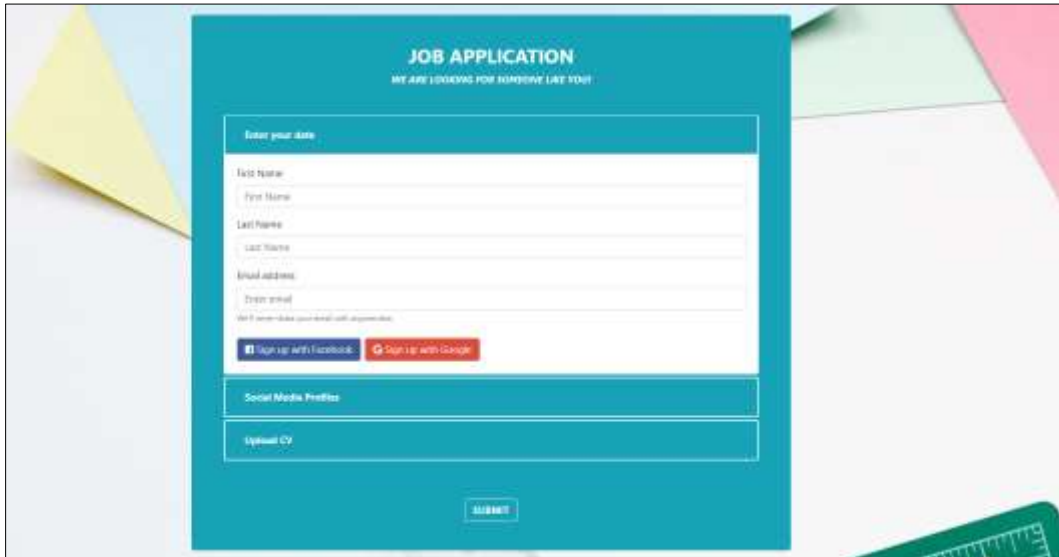

## Personal data section

Use [Bootstrap](#) to create a simple form in the **first section** and add **two buttons** for **sign up**.

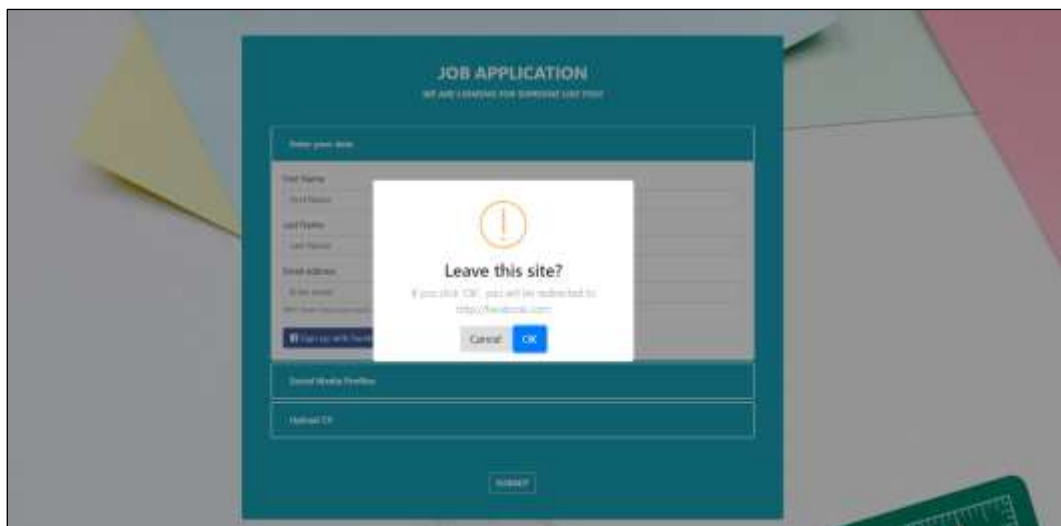

The **buttons** should be **styled** using the [Social Buttons](#) plugin.

Upon **clicking one** of them you should **show a notification** using the [SweetAlert](#) plugin.

The **first section** should look like this:

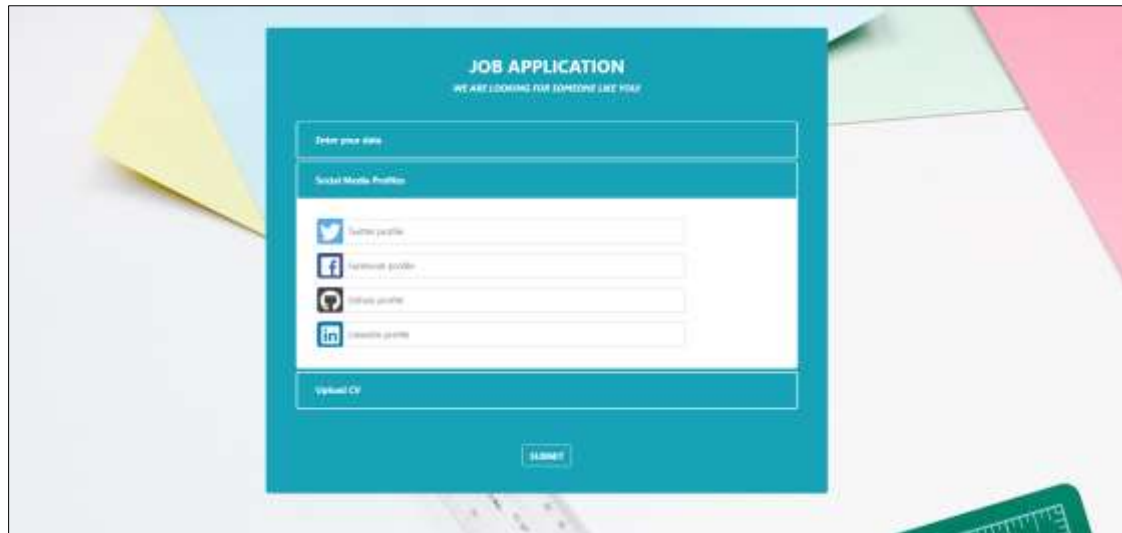

The **notification** you should show upon clicking one of the “**social buttons**” should look like this:

## Social Media Section

This is the **second section**. It should have **4 input fields** for **social media accounts** and they should be styled using the [Social Buttons](#) plugin.

The **second section** should look like this:

**JOB APPLICATION**  
WE ARE LOOKING FOR SOMEONE LIKE YOU!

Enter your name

Social Media Profiles

Twitter profile

Facebook profile

LinkedIn profile

Instagram profile

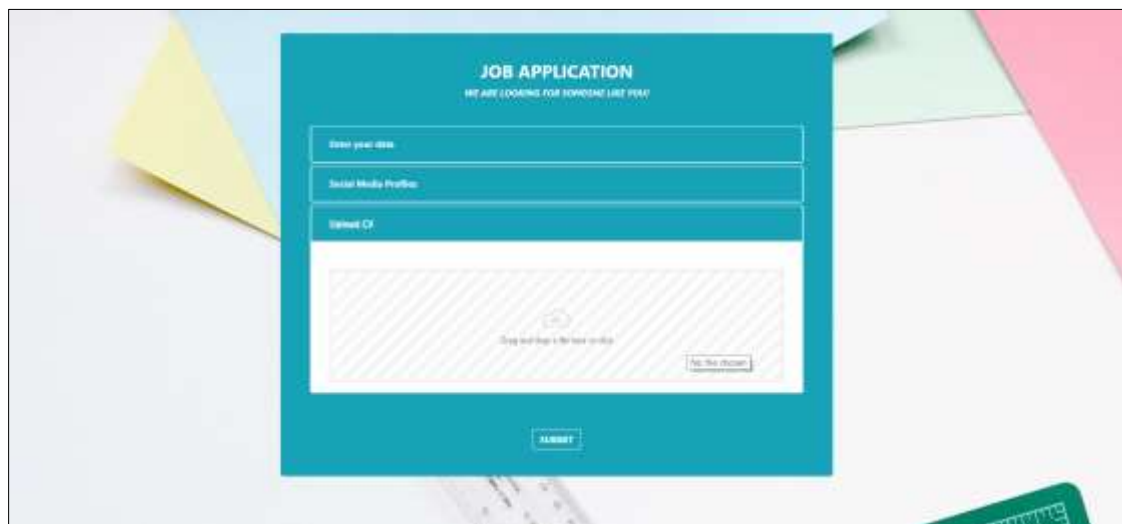

Upload CV

SUBMIT

## Upload CV Section

This is the **third section**. It should have a **single input field**, with type – **file**.  
The **field** should be **styled** using the [Dropify](#) plugin.

The **third section** should look like this:

**JOB APPLICATION**  
WE ARE LOOKING FOR SOMEONE LIKE YOU!

Enter your name

Social Media Profiles

Upload CV

Drop and drag a file here or click

No file chosen

SUBMIT
